

ACKNOWLEDGEMENTS

All gratitude is to Almighty God who guided and helped me to bring this thesis forward.

I would like to express my deep gratitude to Dr. C. Galup-Montoro and Dr. M. C. Schneider, Professors of the Electrical Engineering Department, University Federal of Santa Catarina (UFSC) for their continuous guidance, constructive ideas, and the time and effort they devoted for the supervision of this work.

I also desire to express my sincere gratitude to the research agency of the Brazilian Ministry of Science and Technology (CNPq).

I am sincerely thankful to all the staff member in the laboratory of integrated circuits (LCI) and in the laboratory of electronic circuit instrumentation and signal processing (LINSE) for their great help.
